

EXPERIENCE

Software Developer (RnD Project) — Trafficore

Atharva College of Engineering (R&D Cell)

2026 — Present
Mumbai, India

- Engineered a real-time emergency traffic management system for ambulance-hospital coordination by designing backend services and integrating IoT devices.
- Architected an event-driven system using MQTT and built backend services (Node.js, Express, PostgreSQL) to process live telemetry data (vitals, GPS, traffic signals).
- Implemented a WebSocket-based data pipeline to deliver low-latency updates across multiple dashboards for real-time monitoring and coordination.
- Established end-to-end system connectivity by integrating IoT hardware with backend APIs and frontend interfaces.

Core Team & Cloud Team Member

Google Developer Groups OnCampus ACE

Sep 2025 — Present
Mumbai, India

- Deployed and configured a production-ready Flask backend on GCP using Nginx reverse proxy and SSL via Certbot.
- Designed monitoring and deployment workflows using Prometheus and Ansible to improve system observability and operational reliability.
- Containerized applications using Docker to standardize and streamline development and deployment environments.
- Mentored 12 participants in Cloud Study Jam 2025, driving completion of hands-on labs and contributing to 25+ cloud skill badge outcomes.

PROJECTS

Full Stack Authentication Service

React, Node.js, Express, MongoDB, JWT, Bcrypt

Oct 2025 — Dec 2025
GitHub

- Engineered a production-grade authentication system enabling secure user access by implementing JWT-based authorization, password hashing, and OTP-driven recovery workflows.
- Designed and built RESTful APIs to manage the authentication lifecycle, including token validation, protected routes, and email verification.
- Implemented an email verification pipeline using Nodemailer and integrated a React client with validated forms to ensure reliable and consistent user interactions.

GDGC Designathon 2.0 Platform

React, TypeScript, Tailwind CSS, Framer Motion, GSAP, Vercel

Nov 2025 — Jan 2026
GitHub | Live

- Developed responsive frontend components for a high-traffic hackathon platform supporting 700+ users and 240+ team registrations under live event conditions.
- Optimized registration and onboarding flows to handle peak traffic without performance degradation through efficient UI and state management.
- Enabled continuous deployment by integrating CI/CD pipelines using GitHub and Vercel within a cross-functional team.

SKILLS

Languages	JavaScript, TypeScript, Python, C++
Backend	Node.js, Express.js, REST APIs, WebSockets, MQTT, JWT
Frontend	React.js, Tailwind CSS
Databases	PostgreSQL, MongoDB
Cloud & DevOps	Google Cloud Platform (GCP), Docker, Nginx, Prometheus
Tools	Git, GitHub, Postman, Vercel, Nodemailer

ACHIEVEMENTS

- Team Lead, HackRobo 1.0 — Built an IoT-based search & rescue bot; ranked 9th out of 37 teams.
- AIR 4,967 — AINCAT 2025 among 2.1L+ participants (top 17%).
- Mentored 12 participants in Google Cloud Study Jam 2025; contributed to large-scale program execution.
- GDGC Web Team (Best Team of the Year) — recognized for event platform development.
- Earned 25+ Google Cloud Skill Badges in cloud computing.

EDUCATION

B.E. in Electronics & Telecommunication Engineering, Atharva College of Engineering, Mumbai

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Image Processing & Machine Vision, Artificial Neural Networks

May 2027
